P. W. INGTY,

Addl. Chief Secretary to the Govt. of Meghalaya,
Health & Family Welfare Department.

The 2nd April, 2019.

No.Health.210/2004/Pt/205. - The Governor of Meghalaya is pleased to State that as per National Framework for Malaria Elimination (NFME) 2016-2030, States have been categorized into 3 categories as per their Annual Parasite Incidence (API). In this context, Meghalaya falls under Category 3 (Intensified Control Phase) as the Annual Parasite Incidence (API) of 15.20 has been reflected in the year 2015 owing to the maximum case load. In order to make malaria a notifiable disease, Meghalaya which falls under Category 3 will have to further reduce its case load so that the target API lies within the range of 1-2 to qualify for Category 2 (Pre-Elimination Phase).

The Office of the Deputy Director of Health Services (Malaria) which is implementing the National Vector Borne Disease Control Programme (NVBDCP) has achieved the reduction of Annual Parasite Incidence (API) in the year 2018 and taking into account the 2015 Baseline that has Annual Parasite Incidence (API) of 15.20, the State has had a reduction of 87% in 2018 bringing the Annual Parasite Incidence (API) to 1.83 well within the range of Category 2. Further categorization will need to be done upto the Block Level to identify the high endemic areas as per API to bring along all Districts upto Block Level to move to Category 1 by 2022 (Elimination Phase).

As the State has entered Category 2 (Pre-Elimination Phase) in 2018, making malaria a notifiable disease is hereby notified.

P.W. INGTY,

Additional Chief Secretary to the Govt. of Meghalaya,
Health & Family Welfare Department.
